

445

Head Immobilizer

445

Lightweight and easy to use, provides a complete and safe immobilization of patient head. Designed specifically for the use with the Scoop™ stretchers and backboards.

MAIN FEATURES

- Designed for the safe immobilization of the patient head.
- Composed of two plastic-coated, closed-cell foam head supports, one universal attachment base and two durable head straps.
- The universal base can be used on Ferno Scoop™ stretchers and backboards.
- Large side openings on the support pads for monitoring the patient's ear canal, blood loss or fluid drainage and for maintaining a direct contact with the patient. Easy to place on the large Velcro surfaces of the base plate.
- Center padded, the forehead/chin straps optimize the stabilization of the head for absolute comfort for the patient.
- Waterproof coating makes it easy to clean and prevents bacterial growth within components.
- Model 445 Head Immobilizer will not absorb blood or bodily fluids and it is easy to sanitize.
